The Faculties, for intellectual abilities, moral worth and presonal acquirements, will compare favorably with the most distinguished in our country. The medical faculty constitutes an anomaly in this or any other country—all of them are able lecturers and the best of teachers.

Those who will contemplate our geographical position, and the extent of our population, can have no doubt as to the eligibility of our situation for an enterprise of the kind. As to health, including all seasons of the year, we deny that any OTHER CITY HAS MORE.

health, including all seasons of the year, we deny that ANY OTHER CITY HAS MORE.

A common error exists in the minds of many students relative to the place of studying medicine; those who intend practising among the diseases of the West and South should certainly educate themselves at a School whose Faculty are practically acquainted with those diseases.

That the public may be satisfied of the permanency of this school, we feel it our duty to state, that the Trustees and Faculty form a UNIT in action, which augurs well for its future success; and that the peculiar internal organization which connects them, cannot be interrupted.

Oct. 25th, 1850 THE BENEFITS OF ADVERTISING. THE BENEFITS OF ADVERTISING.

We learn that Dr. S. P. Townsend has sold out the good will of his Sarsaparilla business, including machinery and raw material on hand, for the large sum of \$100,000.

This is an illustration of the advantages and benefits of advertising. The purchasers are Messrs. Nostrand & Back, both wealthy and well known individuals. They have, we understand, employed the celebrated Chemist, Dr. James R. Chilton, who will hereafter have the compounding department under his own immediate supervision. They are men of enterprise, and will, no doubt, sustain the character of this celebrated medicine, which has the reputation of being the best preparation of Sarsaparilla made in the United States. The new proprietors, we understand, warrant their article to stand in all climates any length of time, which we have no doubt of, when manufactured by so practical a chemist as Professor Chilton, who is well known to be one of the first chemists in this country.

chemists in this country. The public are hereby notified that the preparation extensively known as Dr. S. P. Townsend's Compound Extract of Sarsaparilla, is now manufactured under my direction and supervision, from the original factors obtained from Dr. S. P. Townsend, and I certify that it is composed of ingredients purely vegetable, and without Mercury—and also that the ingredients are judiciously compounded, so as to obtain from them their greatest medicinal effects.

The Course of Commerce.

The London Times, in commenting on the news from California, throws out the following suggestions for the benefit of its money-market readers:

"The momentous fact, which nothing can now de away with, is, that 300,000 or 400,000 Anglo-Saxons are settling themselves on the shores of the Pacific. A new world is before them. They look across to China, Japan, and all the riches of the Indian seas. and the use they will make of their opportunities may be best inferred from what they have already accomplished, and from the known aspirations which the people of the United States have so long directed towards that region. Already the presence of a large number of Chinese is a distinctive feature of the population of San Francisco, and already the Sandwich Islands, Australia, and Southern and Central America have been called into a new life from the traffic that has been established. The prophecy fore Recorder Caldwell this morning who actually of Humbolt, that the activity of commerce would be was, during all his life, with the exception of twenty carried progressively from east to west, is rapidly in four hours previous entirely ignorant of the exisare few signs that even this fact is appreciated in is nearly as tall as a steeple, and wrapped in an im-Europe, and the thing to be apprehended is, that mense shaggy, black overcoat, he looked very much arising from it shall have led to excitement, our Caldwell to give an account of his conduct during people, who are regardless of it now, will then rush the night. It is intimated that a shrewd Protectionist has suggested this difficulty to the custom-house authorities, as a sort of last kick against free-trade principles.

Mormonism .- Mr Mackay, the Mormon agent sent out from the Salt Lake settlement to England. some time ago, for the purpose of encouraging emigration to that region, has met with extraordinary success. He states that the Mormons have an emigration fund of three and a half tons of California gold. During the last ten years the emigration of Mormons to the United States is estimated by Mr. Mackay at 14,000, and he thinks at the close of the present year it will amount to 25,000. A large portion of these are farmers and mechanics of good standing in their own country. They are principally from the country. They are principally from the counties of Lancashire and Yorkshire, in Enggland; a large number, however, are from Wales and the southern part of Scotland. Mr. Mackay further states the growth of Mahomedanism, rapid as it was, is not to be compared with the size and growth of Mormonism. This, we are inclined to believe, is a slight mistake.

On the 22d day of May, 1841, a batalion of the military colony, established at Novogordo, was drawn up on the parade ground adjoining the extensive barracks, constructed in the most ancient and solitary portion of the city, near the church St. Sometimes and the fatal plank, he seemed unconscious of the lash that tore his bleeding flesh, and addressing the executioners, he coolly asked if his allotted numbers of blows would be complete.

"They are finished now," said the executioner.

In front of the ranks stood Gen. L-, a tall man of fifty, remarkable for his erect carriage, meagreness, sallow complexion, and large gray, restless eyes. He was known throughout the camp for his bravery, of which he had given many proud proofs in the campaigns of Turkey and Persia; it was clear that domestic infelicities had soured his temper, or that his heart had become hardened by the frequent ap-Arrival of the Steamer Arctic-Four Days Later plications of a discipline, degrading in his nature and often horrible in its effects. good work, in order that you may have time to have it all hauled, before the roads are cut up with the Winter ploughing.-The work must be gone forward with, until completed. We wish to impress this truth upon you-Wet lands are not benefitted by winter ploughing; draining is the process to which they should be subjected.

Upon the benefits derived from fall and winter ploughing of stiff clayey soils, the accomplished and accurate chemist, Dana, has the following truly philosophic and just remarks:

"It is a well authenticated fact, that heavy soil earth then becomes frozen, and its particles being driven asunder by frost, it becomes lighter—in truth, it has been found that the consistency of clay is diminished nearly one half by frost, and loamy clay one-half to two-thirds. It is essential to this change from heavy to light land, that the soil be wet enough while wet, after freezing, the labor of the fall ploughing is lost. A lasting injury is done by ploughing land too wet."

"These decorations belong not to you," he continued: "a knot should be borne by the executioner.—
